**T**HE production of many of the plants in this list represents no little effort. More than a few of the items are not profitable from a business standpoint which accounts for their general scarcity, but on the other hand they are indispensable to good landscape work.

Since we specialize in the execution of complete planting lists we aim to keep our assortment unbroken. To that end we hope you will co-operate by ordering material in reasonable assortment. We cannot always accept orders which are confined to plants that are scarce and our stock of which is limited.

## Deciduous and Evergreen Trees Shrubs and Vines

We recommend that all varieties marked with an asterisk be lifted with ball of earth and sewed in burlap. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve an extra charge per plant, as follows: 2-3'—25c; 3-4'—30c; 4-5'—50c; 5-6'—60c; 6-8'—75c; 8-10'—\$1.00. Larger sizes in proportion. In all instances where "B. & B." is indicated these charges are included in the printed price. We are prepared to deliver heavy specimens on platforms.

The figures printed in italics following each variety, indicate the average height of the plant at maturity.

We can also supply in limited quantity the following varieties of Japanese Flowering Cherries from the collection at Highland Park, Rochester. They are available in the 4 to 5 ft. and 5 to 6 ft. grades at \$1.50 and \$2.00 each, respectively.

**Amanogawa**—semi-double pale pink

**Hata-zakura**—semi-double white

**Horaisan**—double pink

**Hosokawaniioi**—semi-double flesh

**Kwanzan**—double deep pink

**Miyako**—double pink

**Sumizome**—double purplish pink

Our named varieties of Japanese Flowering Cherries are grown on the Japanese type stocks. While the common practice of grafting on the European Mazzard stock is a cheaper method of propagation, it results in short-lived trees, which difficulty is overcome by using Japanese stocks.
